Work planning

• Definition of work inside and outside of WULCA
• Timeline and expected deliverables
• Timing related to Pellston workshop and stress-related work
• Work leader and contributors
• Pellston workshop: experts to propose...?
• Decision process
Human Health

Inventory

Volume of water unavailable to other users

Distribution of water deprivation

Water deprived for domestic users
Water deprived for agriculture
Water deprived for fisheries

Compensation processes

Volume of water to be obtained through compensation

Midpoint impacts

Socio-economic parameter

Volume of water deprived causing health damages

Scarcity

Impact on human health

FATE

Exposure

Effect

Water-related diseases effect per m³ deprived (dom)

Malnutrition effect per m³ deprived (agri)

Malnutrition effect per m³ deprived (fish)

Disruption of water balance
Change in flow quantity

Terrestrial species loss per m³ deprived
Aquatic species loss per m³ deprived

Loss of water quality

Overuse of renewable water bodies

Fossil groundwater depletion
## Human Health

**List of modeling aspects and choices**
